

THE ECO COIN

A CRYPTOCURRENCY BACKED BY SUSTAINABLE ASSETS

When you cut a tree and sell the wood, you will earn money. When you plant a tree, you are creating value, but you won't get paid. What if there was a new currency to reward sustainable actions? There is, and we call it the ECO Coin.

Join us on April 20th in Amsterdam for the launch of the ECO Coin white paper: A new cryptocurrency backed by ecological assets. Can't make it to the launch? The event will be livestreamed on Facebook. More information [here](#).

After the launch the white paper will be free to download by visiting ecocoin.com
